EDUCATION

Landmark University   Graduated Sept 2022
BEng in Electrical and Information Engineering, Certificate in Information Engineering   *Cumulative GPA: 4.87*
Coursework: Software Engineering, Micro-controllers, Data Structures, Algorithms, Programming in C, Object-Oriented Programming, Differential Equations, Linear Algebra, Discrete Maths, Probability and Statistics, Project Management.

SKILLS & TECHNICAL TOOLS

Languages: Javascript, Typescript, C, C++, HTML, CSS, SQL, PHP.
Technologies: Git, AWS, React, Vue, Jest, Cypress, NextJS, NestJS, NodeJS, PostgreSQL, MongoDB, Redis, Docker, Linux Kernal, Serverless, DevOps, System Design & Agile.

EXPERIENCE

Triple7events UK | Software Engineer - Events & Fuel Station Platform   *May 2023 - Dec 2023*
- Re-engineered the event ticketing web platform with modern technologies resulting in a 50% increase in the platform's speed and overall user experience.
- Developed intricate UIs with React and other web frameworks while implementing rigorous testing (Cypress) to ensure robust test coverage for UI components.
- Established and enforced enhanced coding standard, thereby elevating confidence in the codebase.
- Innovated features: Real Time Synchronization of Ingresso UK events & local events, Effective caching with react query.

UpstackHq | Full Stack Developer   *Oct 2022 - Feb 2023*
- Spearheaded the redesign of a slackbot application by crafting the application from ground up using modern technologies and frameworks for improved user experience and a polished user interface.
- As a result of the revamped website's exceptional UI and seamless user experience, usage surged by an impressive 70%.
- Collaborated closely with a team of developers to build the company's core portal using Typescript, React & Tailwind adopting modern code styles and standardized workflows.

Jetron Mall | Full Stack Developer   *Dec 2020 - Oct 2022*
- Developed a fully scalable web application with NodeJS, React and Typescript employing best practices and ensuring faster and quality feature releases.
- Ensured the web application was SEO compliant allowing effective search engine crawling and ranking.
- Achieved a 40% performance boost in the application through global state management, analyzed with React profiler.

Hellio Solutions | Web Developer   *Jun 2019 - Jul 2020*
- Elevated efficiency by 80% in the file loading/parsing time for large documents with over 600,000 contacts through meticulous optimizations of PHP and Javascript features.
- Led the enhancement of designs and overall product experience contributing to the streamlined processing of extensive datasets.
- Successfully transitioned key platform products from JQuery to React and typescript, ensuring the adoption of modern solutions across various products, including accurate statistics reports and visualization.

PROJECTS

Brigow Shortlets | *React, Typescript & NodeJS*
- Developed a full-stack application to connect home-owners to home seekers across various locations, integrating google map and geolocation systems.
- Incorporated Redis queue to handle jobs and complex processes asynchronously while delivering suitable user experience for users.
- Leveraged Typescript for better code reliability and wrote unit tests with cypress and react testing library (RTL).

Artefix App | *React, Typescript & NestJS*
- Integrated cutting-edge geomapping functionalities into the project, enhancing the user experience by enabling artisans to efficiently connect with individuals seeking installation or repair services based on geographic proximity.
- Implemented robust payment and testing integrations within the project, ensuring seamless and secure transactions.
